

What you need to know about the vaccines for COVID-19

Thousands of highly respected scientists and physicians, and many international medical organizations are sounding the alarm because millions of people have died and hundreds of millions are disabled after being injected with the experimental vaccines for COVID-19. Data from the American CDC shows that in the USA alone already 1,563,950 people suffered adverse events, including death, stroke, heart failure, blood clots, brain disorders, convulsions, seizures, inflammations of brain & spinal cord, life-threatening allergic reactions, autoimmune diseases, arthritis, miscarriage, infertility, rapid-onset muscle weakness, deafness, blindness, narcolepsy, and cataplexy. However, a CDC healthcare fraud detection expert investigated this and came to the shocking discovery that the number of adverse events is five to ten times higher than what the CDC is admitting. The famous Lazarus report from Harvard Pilgrim Health Care in 2009 revealed that in general only 1% of adverse events from vaccines is being reported. According to this study, numbers of adverse events and deaths should be multiplied with a factor of 100, in order to understand the true prevalence of serious vaccine injuries. If we apply this to the worldwide situation, it reveals that hundreds of millions are severely injured and many millions have died, from these injections. Why are the covid vaccines so dangerous? In the past 20 years, many attempts were made to develop a safe coronavirus vaccine, but they all failed: the animals in the tests always died! While testing the covid shots, all animals died again, so they stopped testing! Nevertheless these extremely dangerous vaccines were released to all of humanity, with devastating outcomes. The world renown film "Died Suddenly" documents how millions worldwide have dropped dead, without any warning.

Why was this extremely dangerous vaccine imposed onto all of humanity anyway? Scientific data shows that COVID-19 has a survival rate of 99.7%, similar to the seasonal flu, and there are many effective cures, like hydroxychloroquine, ivermectin, budesonide, chlorine dioxide, and many more. These have no side effects, are totally safe and are widely available in every nation of the world. This means that no vaccine is needed whatsoever. So what is really going on here? To see abundant evidence for the above and to understand what is truly happening in our world, visit this website:
