

Did you know that the World Health Organization is a one world government?

Top experts from the WHO and UN explain how the “Pandemic Treaty” gives the WHO full authority over almost every country, during a pandemic. They can declare pandemics at will. All they need is a diagnostic tool, that creates “cases”, like the PCR test that produces up to 94% false positives. The WHO is owned entirely by private financial entities, who use it to gain control over humanity.
